

ALUMINIUM SYSTEM SCAFFOLD

The most versatile scaffold money can buy.

SYSTEM

all standards and braces are constructed with extruded 2.6mm aluminium tubing

- Light weight
- 500mm transom centres
- Speed in erection and dismantle
- 2.6mm wall thickness tube
- 30% cheaper than equivalent Aluminium Mobile Towers
- Totally walk-through construction
- Build over and around almost any structure
- 48.6mm outside diameter tube (adapts to standard fittings and jacks)
- Adapts to Advance standard mobile decks

The most versatile scaffold money can buy.

Ideal for painters and renderers, System Scaffold can be built over, under or around almost anything. The design allows for total walk-through.

Highly adaptable, it is compatible with standard Advance Scaffold mobile decks. Light yet strong, it is quick to assemble and bring down.

Most importantly, System Scaffold is 30% cheaper than equivalent mobile towers. Purchase more scaffold or simply reduce project costs.
